

Funding Opportunity Update

RESOURCES FOR CLEAN AIR AGENCIES

For more information, contact Mary Sullivan Douglas, mdouglas@4cleanair.org, or Miles Keogh, mkeogh@4cleanair.org, 202-624-7864

Here's a roundup of current open opportunities that local and state agencies may wish to explore for project funding. If NACAA can be helpful in connecting with or applying for funding, we're your team and have experience in this kind of thing – please don't hesitate to ask.

National Association of Clean Air Agencies
Grant and Funding Opportunities for Local and State Agencies
August 29, 2018

* Denotes new opportunity since the last NACAA Grant and Funding Opportunities Newsletter

U.S. Environmental Protection Agency

Volkswagen Mitigation Trust

The U.S. government and VW resolved allegations that VW violated the Clean Air Act by selling diesel vehicles equipped with defeat devices. As part of this settlement, VW has provided significant funding into an Environmental Mitigation Trust. States will develop plans for the use of these funds, including grant programs for nitrogen oxide mitigation efforts. See www.vwclearinghouse.org

Department of Health and Human Services

Low Income Housing Energy Assistance Program (LIHEAP)

LIHEAP has provided assistance to families for costs associated with home energy bills, energy crises and weatherization and energy-related minor home repairs. See <http://www.acf.hhs.gov/ocs/programs/liheap/about>

Department of Homeland Security

*FY 2018 Pre-Disaster Mitigation

The Pre-Disaster Mitigation (PDM) program makes available federal funds to implement and sustain cost-effective measures to reduce the risk to individuals and property from natural hazards, while also reducing reliance on federal funding from future disasters. See <https://www.grants.gov/web/grants/view-opportunity.html?oppld=307874>

IC Bus

Grants Toward the Purchase of Propane School Buses

This grant program offers qualifying school districts throughout the U.S. \$5,000 in grants per newly purchased propane-powered CE Series school buses. See <https://www.icbus.com/bus>

U.S. Department of Energy

Property Assessed Clean Energy (PACE) Program

PACE is an innovative mechanism for financing energy efficiency, solar and related improvements on private property. PACE programs allow local and state governments and other authorities, when authorized by state law, to fund the up-front cost of energy improvements on commercial and residential properties, which are paid back over time by the property owners. See <http://energy.gov/eere/slsc/property-assessed-clean-energy-programs> and <http://www.pacenation.us/resources/all-programs/>

SolSmart Technical Assistance – Nationally Distinguished, Locally Powered

SolSmart is a technical assistance program for local governments. The program is designed to drive greater solar deployment and help make it possible for more homes and businesses to access affordable and renewable solar energy to meet their electricity needs. SolSmart experts will design personalized action plans for communities that outline a path to designation as a SolSmart community, along with an approximate timeline. See <http://www.gosparc.org/>

U.S. Department of Transportation

Railroad Rehabilitation & Improvement Finance (RRIF) Loans

Funds are used to acquire, improve or rehabilitate intermodal facilities, refinance outstanding debt and develop new intermodal facilities. Direct loans can fund up to 100 percent of a railroad project with repayment periods of up to 35 years and interest rates equal to the cost of borrowing to the government. Priority is given to projects that provide public benefits, including benefits to public safety, the environment (including air quality) and economic development. See <https://www.transportation.gov/buildamerica/programs-services/rrif> and <https://www.transportation.gov/buildamerica/programs-services/rrif/applicant-information>

Federal Aviation Administration, Voluntary Airport Low Emissions Program (VALE)

Some airports are included on a fairly short list of airports that are eligible to apply for funds for low emission vehicles, refueling and recharging stations, gate electrification and other airport air quality improvements. See <https://www.faa.gov/airports/environmental/vale/>

Accelerated Innovation Deployment (AID) Demonstration

The Federal Highway Administration AID Demonstration provides incentive funding for any project activities eligible for assistance under title 23, U.S.C. in any phase of a highway transportation project between project planning and project delivery including planning, financing, operation, structures, materials, pavements, environment and construction that address the program goals. See <http://www.grants.gov/web/grants/view-opportunity.html?oppld=288651> and <https://www.fhwa.dot.gov/innovation/grants/>

Transportation Infrastructure Finance and Innovation Act (TIFIA)

The Fixing America's Surface Transportation (FAST) Act authorizes \$1.435 billion in capital over five years for the TIFIA credit assistance program; assistance supports critical infrastructure projects with national or regional significance. Letters of interest may be submitted by states and cities for direct loans, loan guarantees and standby lines of credit.

Transit-oriented development (including pedestrian and cycle facilities) and other projects may be eligible for assistance. See <https://www.transportation.gov/tifia/notice-funding-availability>

National Park Service and Clean Cities

National Parks Initiative

This effort supports transportation projects that educate park visitors on the benefits of cutting petroleum use and vehicle emissions. Since 2010, 35 projects have deployed alternative fuel and fuel-efficient vehicles to the road, reduced vehicle idling and improved vehicle efficiency. See <https://cleancities.energy.gov/national-parks/>

Patagonia

Environmental Grants

This grant opportunity is available to organizations working to protect the environment. Projects must be action-oriented, build public involvement and support, be strategic, focus on root causes and accomplish specific goals and objectives. One proposal per group will be accepted each fiscal year (May 1-April 30) and the funding amount will range between \$5,000-\$20,000. See <http://www.patagonia.com/grant-guidelines.html>

Project Learning Tree GreenWorks! Program

Environmental Education Grants

Grants of up to \$1,000 are available to organizations for environmental service-learning projects that link classroom learning to the real world. Students implement an action project that they help design to green their school or to improve an aspect of their neighborhood's environment. The projects partner students with their whole school, local businesses and/or community organizations and provide opportunities for student leadership. See https://www.plt.org/resources/greenworks-grants/?utm_content=&utm_medium=email&utm_name=&utm_source=govdelivery&utm_term

Captain Planet Foundation

EcoTech Grants

EcoTech grants are offered to engage children in inquiry-based, STEM-related projects (including air quality education) that leverage technology and/or use nature-based design to address environmental problems in local communities. EcoTech grants encourage educators and students to explore the role technology can play in designing and implementing solutions to some of our most pressing environmental challenges. Grants are available as cash of up to \$2,500 and support the purchase of materials and other project implementation expenses.

See

https://captainplanetfoundation.org/grants/ecotech/?utm_content=&utm_medium=email&utm_name=&utm_source=govdelivery&utm_term

Ford Foundation

Funding to Fight Inequality

The Foundation supports projects that address inequality; projects should relate to themes including investing in and protecting vital public goods (may include air quality environmental justice-related projects). See <https://www.fordfoundation.org/work/our-grants/>

The Fruit Tree Planting Foundation (FTPF)

Orchard Donation Program

FTPF is a nonprofit charity dedicated to planting fruit trees and plants to alleviate world hunger, combat global warming, strengthen communities and improve the air, soil and water. FTPF programs strategically donate orchards where the harvest will best serve communities for generations, at places such as community gardens, public schools, city/state parks, low income neighborhoods and Native American reservations. See <http://www.ftpf.org/apply.htm>
