

APTI COURSE UPDATE PRIORITIES

February 1, 2012

(based on Mike Koerber's June 30, 2011 email)

The following classes were discussed and approved on the Feb 8, 2011 JTC call as the courses in most need of updating:

Course #	Title	Current Status
SI 476B (and APTI 474)	Continuous Emissions Monitoring Systems	NCOA is updating both (SI and classroom versions)
SI 460	Introduction to Permitting	NCOA is updating
SI 446	Air Pollution Source Inspection	NCOA is updating
SI 417	Controlling VOC Emissions from Leaking Process Equipment	NCOA is updating
SI 445	Introduction to Baseline Source Inspection Techniques	NCOA is updating
SI 428	Introduction to Boiler Operations	NCOA is updating
SI 434	Introduction to Ambient Air Monitoring	NCOA is updating
SI 410	Introduction to Dispersion Modeling	OAQPS/AQMG is updating (along with SI 409, Basic Air Pollution Meteorology)

NCOA is updating content only. They will be formatted for the LMS under the LMS contract. SI 409 and 410 will need to be formatted for the LMS in some fashion.

The following classes were discussed and approved on the June 14, 2011 JTC call as the next wave of SI courses to be updated:

SI 431 - Air Pollution Control Systems for Selected Industries

SI 412A - Fabric Filter Operation Review

SI 471 - General QA Consideration for Ambient Air Monitoring

SI ??? - MACT Control Series

SI 456 - Prevention of Significant Deterioration *(they may have meant the archived course SI 453, Overview of PSD Regulations?)*

Before proceeding with updating these classes, Mary Boyer will determine whether NCOA has in-house expertise at NCOA and whether there is sufficient money available in the budget.
