

Missouri's Affordable Clean Energy (ACE) Rule Update

Darcy A. Bybee

Director, Air Pollution Control Program

Missouri Department of Natural Resources

May 19, 2020

Final Ace Rule – Missouri’s Affected Sources

Facility Name	Owner	# of Units
Labadie	Ameren	4
Meramec *	Ameren	2
Rush Island	Ameren	2
Sioux	Ameren	2
New Madrid	Associated Electric Cooperative Inc.	2
Thomas Hill	Associated Electric Cooperative Inc.	3
Sikeston Power Station	City of Sikeston	1
John Twitty Energy Center	City of Springfield	2
Hawthorn	Evergy	1
Iatan	Evergy, Liberty Utilities, Missouri Joint Municipal Electric Utility Commission	2
Asbury *	Liberty Utilities	1

* Meramec and Asbury facilities expected to retire prior to ACE compliance deadline

Missouri's Statutory Requirements

- RSMo 640.090 (effective October 2015) applies to nonattainment area plans and plans relating to carbon emissions for existing sources performance standards
- Requirements include:
 - hold stakeholder meeting to solicit stakeholder input
 - “electric generators and loading serving entities, industrial energy consumers, citizen consumer groups, and renewable energy groups”
 - develop implementation impact report
 - submit plan and report to the Governor and legislative body
 - post plan and report on website for one year

Missouri's Statutory Requirements (cont.)

- Implementation Impact Report
 - Impact of plan on:
 - Taxes and general revenue
 - Citizen health – scientific peer reviewed studies
 - Electric generation, supply, distribution, and reliability
 - Review of:
 - Existence and cost efficiency of technology
 - Remaining useful life of affected sources (if provided)
 - Depreciation schedules for early retirement sources
 - Policy options – less stringent standards or longer compliance schedules
 - Information about how other states are formulating their plans

MO's ACE State Plan Development - Tentative Schedule

- ✓ Affected Unit Roundtable: August and December 2019
- ✓ Initial Stakeholder Meeting: Dec 2019
