Re: Support for Air Agencies During Clean Power Plan Rollout

Date: July 28, 2015

---

The upcoming NACAA Board of Directors and Committee Chairs' Summer Meeting in Williamsburg, VA will include a discussion of U.S. EPA's release of the final Clean Power Plan (CPP). We have allocated approximately 30 minutes to discuss opportunities for NACAA to provide additional assistance to state and local air agencies. Please come prepared to discuss the following questions:

1. What Clean Power Plan rollout activities are you expecting from EPA?
2. What rollout activities should NACAA engage in to support state implementation efforts (e.g. a series of technical webinars on specific issues)?
3. Are there any issue areas or concerns you would like NACAA to monitor closely?
