

## EPA Compilation of Links to Data Used for Proposed CSAPR Updates

December 16, 2015

On Monday, December 14, 2015, NACAA held a conference call to discuss EPA's proposed updates to the Cross-State Air Pollution Rule to address the 2008 ozone NAAQS. EPA staff joined NACAA members for the first hour of the call to answer questions, many of which related to data used by EPA to develop the proposal. At that time, David Risley of EPA's Office of Atmospheric Programs committed to providing a compilation of links to various modeling results, assessments and other resources that are available in the docket and/or on EPA's website. That compilation of links is below.

If you have questions about this information, please contact David at [Risley.David@epa.gov](mailto:Risley.David@epa.gov).

### EPA's base case power sector modeling

- NEEDS v.5.15, [link](#) to the docket
  - Description of generating resources included in the modeling  
[http://www.epa.gov/sites/production/files/2015-07/documents/chapter\\_4\\_generating\\_resources\\_0.pdf](http://www.epa.gov/sites/production/files/2015-07/documents/chapter_4_generating_resources_0.pdf)
- IPM base case modeling results
  - Links to the [state-level emissions](#), the [system summary report](#), and the [2018 parsed file](#)

### EPA's EGU NOx reduction potential modeling

Note: EPA did not create parsed files in the post-processing of these model runs.

- \$1,300 uniform cost threshold assessment (used for the proposed emissions budgets)  
Links to the [state-level emissions](#) and Link to the [system summary report](#)  
Link to the [detailed model run data](#), including model plant-level data in the RPE file\*
- \$500 uniform cost threshold assessment (used for the less-stringent alternative)  
Links to the [state-level emissions](#) and Link to the [system summary report](#)
- \$3,400 uniform cost threshold assessment (used for the more-stringent alternative)  
Links to the [state-level emissions](#) and Link to the [system summary report](#)

Additional cost thresholds assessed:

- \$5,000 cost threshold links to the [state-level emissions](#) and Link to the [system summary report](#)
- \$6,400 cost threshold links to the [state-level emissions](#) and Link to the [system summary report](#)
- \$10,000 cost threshold links to the [state-level emissions](#) and Link to the [system summary report](#)

### Other documents requested

- EPA [memo](#) on inclusion of the Clean Power Plan in the baseline for the proposal
- EPA's [EGU NOx mitigation strategies TSD](#)
- EPA's [ozone transport policy analysis TSD](#)

\* Detailed model run data for the \$500 and \$3,400 assessment as well as additional cost threshold assessments are available in the docket for the proposal. Instructions on how to request these data are explained in the pdf [here](#).
