

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

MAR 21 2017

MEMORANDUM

OFFICE OF THE
CHIEF FINANCIAL OFFICER

SUBJECT: FY 2018 President's Budget: Major Policy and Final Resource Decisions

FROM: 
David A. Bloom
Acting Chief Financial Officer

TO: Acting General Counsel
Acting Assistant Administrators
Inspector General
Chief of Staff
Acting Regional Administrators

This memorandum communicates final resource levels and policy guidance to support the Environmental Protection Agency's FY 2018 President's Budget submission to Congress. The agency's budget will be submitted at \$5.655 billion, a 31 percent decrease from the FY 2017 annualized Continuing Resolution level, and it assumes a full time equivalent ceiling of 11,547.6.

This resource level will require taking a comprehensive look at our priorities and thinking differently about the best ways to accomplish our core statutory responsibilities. The agency will need to update and strengthen performance information in support of this direction. The Administration intends to use an evidence-based approach to improving programs and services including reporting critical performance metrics.

The Administration's focus on infrastructure is reflected in funding levels for the nation's drinking and wastewater infrastructure, at \$2.3 billion for the State Revolving Funds and \$20 million for new Water Infrastructure Finance and Innovation Act program. Brownfields project efforts are supported at \$75 million. In addition, the work required for the new TSCA legislation is supported with a \$14 million increase.

The agency's work will center on our core legal requirements, federal-only and national efforts, providing support to states in implementing environmental laws, and easing regulatory burden. In line with this approach, many voluntary programs are eliminated. Locally-focused geographic efforts also are eliminated, including the geographic programs and Alaska Native Villages and Mexico Border activities. Non-core international efforts are reduced as well. Reductions to other work will require priority-setting across ongoing activities. Notably, fee-based funding is encouraged.

Reductions impact state and tribal categorical grant funding, provided at \$597 million. Within these levels, voluntary programs along with certain mature programs are eliminated. Again the focus will be on priority core requirements. We will need to work together with our partners to reshape our priorities and programs, streamline activities and avoid duplication.

These resource levels require us to think about the work we do and how we do it, the way we are organized and the geographic location and spaces we occupy. The agency will continue to seek opportunities to reduce further our facility footprint and/or implement planned and pending moves in an expedited and cost effective manner. The OARM will work closely with impacted program and regional offices to ensure we implement this new model consistently across the agency and that we support our core agency operations.

To provide additional clarity on priorities, as well as deliberation on options and impacts, I am asking you to provide details on those activities that will be supported, reduced and eliminated at this level of funding relative to FY 2016 activities. These responses will be provided to leadership for review and concurrence or follow on discussions, as appropriate, to support the development of the budget request.

The template to complete this request is attached. This work will be the foundation for the agency's FY 2018 Congressional Justification and accompanying communications that will follow its release. Programs are expected to work with appropriate lead regions. I thank you in advance for your attention to this aspect of our FY 2018 budget.

The untimely release of information is not productive and creates unintended consequences. Please share the materials only with those individuals who need to have access, *i.e.*, your program leaders and resource management community members who are directly involved in developing the President's Budget and the agency's Congressional Justification. Consistent with prior budget preparation activities, the Office of Management and Budget's Circular A-11 stipulates that, until the President releases the budget, this memorandum, attachments, and all budget presentation materials, are confidential and must be protected to prevent release outside the agency.

More information regarding final funding and policy guidance as well as a revised schedule for developing the FY 2018 President's Budget and supporting Congressional Justification are attached. Further detailed technical guidance is forthcoming from Carol Terris, Director of the Office of Budget, and Kathy O'Brien, Director of the Office of Planning, Analysis and Accountability.

Thank you again in advance for all your efforts as we begin to plan for this new direction.

President's Budget: Base Budget Adjustments

NPM / Appropriation / Program Project (FY 2016 ENA Base Non-Pay \$K/FTE)	FY 2018 Adjustments			
	HQ \$K	FTE	RT \$K	FTE
OA / EPM / Brownfields \$586 K; 3.8 FTE This decision reduces \$401K in nonpay funding and 1.5 FTE, returning the responsibility for funding local environmental efforts and programs to state and local entities.	(\$401)	(1.5)	\$0	0.0
OA / EPM / Homeland Security: Communication and Information \$406 K; 9.7 FTE This program change decreases \$101K in non-pay resources and 0.4 FTE. This slightly scales back OA's homeland security communication and coordination efforts.	(\$101)	(0.4)	\$0	0.0
OA / EPM / Integrated Environmental Strategies \$2,115 K; 55.8 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$2,100)	(53.3)	(\$15)	(2.5)
OA / EPM / Civil Rights / Title VI Compliance \$1,039 K; 64.0 FTE This decision includes the following: 1) reduction of \$268K in nonpay and 10.7 FTE; 2) reorganization of External Compliance of the Office of Civil Rights into OGC (OA and OGC are to jointly submit a technical adjustment form for associated nonpay and FTE changes).	(\$268)	(6.1)	\$0	(4.6)
OA / EPM / Executive Management and Operations \$2,131 K; 307.4 FTE This decision includes the following: 1) elimination of the Office of Public Engagement and the associated 12.0 FTE; 2) reduction of 73.8 FTE in offices funded from this program project; and 3) net increase of \$367K in nonpay funding for essential workforce support for the remaining FTE.	(\$1)	(44.0)	\$368	(41.8)
OA / EPM / Environmental Education \$7,154 K; 11.1 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$7,154)	(6.1)	\$0	(5.0)
OA / EPM / Regional Science and Technology \$1,164 K; 2.0 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	\$0	(2.0)	(\$1,164)	0.0
OA / EPM / Science Advisory Board \$646 K; 21.6 FTE This decision reduces \$542K in nonpay funding and 2.9 FTE to reflect an anticipated lower number of peer reviews.	(\$542)	(2.9)	\$0	0.0
OA / EPM / Small Minority Business Assistance \$372 K; 8.9 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$372)	(8.9)	\$0	0.0

President's Budget: Base Budget Adjustments

NPM / Appropriation / Program Project (FY 2016 ENA Base Non-Pay \$K/FTE)	FY 2018 Adjustments			
	HQ \$K	FTE	RT \$K	FTE
OA / EPM / Small Business Ombudsman \$1,185 K; 4.9 FTE This decision reflects the following: 1) a reduction of \$90K in nonpay funding and 0.3 FTE; and 2) consolidating the work of Small Minority Business Assistance activities into this program.	(\$90)	(0.3)	\$0	0.0
OA / EPM / Children and Other Sensitive Populations: Agency Coordination \$3,207 K; 21.8 FTE This decision reduces Children's Health program resources by \$2,391K and 14.9 FTE to prioritize core environmental work.	(\$2,241)	(10.5)	(\$150)	(4.4)
OA / EPM / Regulatory/Economic-Management and Analysis \$564 K; 81.3 FTE This decision reduces 24.3 FTE to reflect the decrease in new regulatory actions. An increase of \$164K in nonpay funding is provided for essential workforce support.	\$164	(24.3)	\$0	0.0
OAR / EPM / Clean Air Allowance Trading Programs \$4,624 K; 71.4 FTE This program change decreases \$2,711K in non-pay resources for the implementation of the Acid Rain program.	(\$2,711)	(6.7)	\$0	(1.0)
OAR / EPM / Climate Protection Program \$66,925 K; 190.3 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$66,772)	(167.8)	(\$153)	(22.5)
OAR / EPM / Federal Stationary Source Regulations \$5,247 K; 122.5 FTE This program change decreases \$1,187K in non-pay resources and 43.4 FTE. The reduction should be focused on non-core statutory work, such as climate work and also reflect an increased role of states in achieving stationary source regulations.	(\$1,187)	(43.4)	\$0	0.0
OAR / EPM / Federal Support for Air Quality Management \$8,374 K; 821.8 FTE This program change decreases 237.1 FTE, including those that provide support for audit of state air laboratories and other air activities.	\$0	(77.1)	\$0	(160.0)
OAR / EPM / Indoor Air: Radon Program \$1,341 K; 10.6 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$1,341)	(10.6)	\$0	0.0
OAR / EPM / Radiation: Protection \$2,340 K; 36.8 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$2,330)	(34.7)	(\$10)	(2.1)

President's Budget: Base Budget Adjustments

NPM / Appropriation / Program Project (FY 2016 ENA Base Non-Pay \$K/FTE)	FY 2018 Adjustments			
	HQ		RT	
	\$K	FTE	\$K	FTE
OAR / EPM / Radiation: Response Preparedness \$57 K; 15.3 FTE This program change decreases 3.4 FTE and includes a minor increase of \$43K for workforce support. The program should coordinate to prioritize the most high priority activities and streamline work.	\$43	(2.6)	\$0	(0.8)
OAR / EPM / Stratospheric Ozone: Domestic Programs \$1,457 K; 22.0 FTE This program change decreases \$629K non-pay resources and 4.0 FTE. The program should prioritize work on the most critical alternative chemicals.	(\$628)	(4.0)	(\$1)	0.0
OAR / EPM / Stratospheric Ozone: Multilateral Fund \$8,928 K; 0.0 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$8,928)	0.0	\$0	0.0
OAR / EPM / Reduce Risks from Indoor Air \$7,581 K; 39.1 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$7,386)	(26.0)	(\$195)	(13.1)
OAR / S&T / Clean Air Allowance Trading Programs \$7,808 K; 0.0 FTE This program change decreases \$1,569K in non-pay resources for the implementation of the Acid Rain program.	(\$1,569)	0.0	\$0	0.0
OAR / S&T / Climate Protection Program \$2,926 K; 33.8 FTE This program has been eliminated. Please see attachment on eliminated programs for details.	(\$2,926)	(33.8)	\$0	0.0
OAR / S&T / Federal Support for Air Quality Management \$4,737 K; 19.2 FTE This program change decreases \$3,513K in non-pay resources and 3.1 FTE, reflecting the re-focusing and streamlining of agency work.	(\$3,513)	(3.1)	\$0	0.0
OAR / S&T / Federal Vehicle and Fuels Standards and Certification \$48,681 K; 304.5 FTE This program change reduces \$48,011K in non-pay resources and 168.2 FTE. Legislative language will be submitted to fee-fund this FTE and non-pay amount in FY 2018. OAR is to update the Motor Vehicle Engine Compliance fee to full cost recovery as quickly as possible, and the increment of additional collections will provide funding to the program.	(\$48,011)	(168.2)	\$0	0.0
OAR / S&T / Homeland Security: Preparedness, Response, and Recovery \$3,699 K; 11.0 FTE This program change decreases \$1,017K in non-pay resources and 1.0 FTE. This reduces support for the RadNet program.	(\$1,017)	(1.0)	\$0	0.0

President's Budget: Base Budget Adjustments

NPM / Appropriation / Program Project (FY 2016 ENA Base Non-Pay \$K/FTE)	FY 2018 Adjustments			
	HQ \$K	HQ FTE	RT \$K	RT FTE
OAR / S&T / Homeland Security: Protection of EPA Personnel and Infrastructure				
\$552 K; 0.0 FTE	(\$52)	0.0	\$0	0.0
This program change decreases \$52K in non-pay resources for lab physical security.				
OAR / S&T / Indoor Air: Radon Program				
\$172 K; 0.0 FTE	(\$172)	0.0	\$0	0.0
This program has been eliminated. Please see attachment on eliminated programs for details.

President's Budget: Base Budget Adjustments

NPM / Appropriation / Program Project (FY 2016 ENA Base Non-Pay \$K/FTE)	FY 2018 Adjustments			
	HQ \$K	FTE	RT \$K	FTE
OARM / EPM / Homeland Security: Protection of EPA Personnel and Infrastructure				
\$5,346 K; 0.0 FTE	(\$360)	0.0	\$0	0.0
This program change decreases \$360K in non-pay resources. This reduces efforts related to personnel security in line with overall staffing reductions.				
OARM / EPM / Administrative Law				
\$440 K; 25.8 FTE	(\$378)	(2.0)	\$0	0.0
This decision reduces \$378K in nonpay and 2.0 FTE to reflect an anticipated reduction in workload as enforcement centers on federal-only areas of responsibility.				
OARM / EPM / Facilities Infrastructure and Operations				
\$258,437 K; 318.3 FTE	(\$10,101)	(24.4)	\$0	(15.5)
This decision reduces \$10,101K in nonpay and 39.9 FTE and reflects a decrease in facility management services commensurate with elimination of programs and a lower workforce level across the agency.				
OARM / EPM / Acquisition Management				
\$6,322 K; 177.6 FTE	(\$3,353)	(26.1)	\$0	(4.9)
This decision reduces \$3,353K in nonpay and 31.0 FTE reflecting a lower level of contract resources agencywide. The program is encouraged to explore further use of shared services to increase efficiencies.				
OARM / EPM / Human Resources Management				
\$10,710 K; 226.1 FTE	(\$2,034)	(20.3)	\$0	(3.8)
This decision reduces \$2,034K in nonpay and 24.1 FTE. Activity will focus on workforce reshaping.				
OARM / EPM / Financial Assistance Grants / IAG Management				
\$5,863 K; 143.6 FTE	(\$2,091)	(19.3)	\$0	(23.8)
This decision reduces \$2,091K in nonpay and 43.1 FTE, reflecting: 1) a lower level of grant resources agencywide; 2) an increased reliance on webinars and on-line training to maintain a skilled grants and Interagency Agreements specialists; and 3) continued progress on modernizing the legacy grants system.				
OARM / EPM / Great Lakes Restoration				
\$840 K; 1.0 FTE	(\$824)	0.0	(\$16)	(1.0)
This program has been eliminated. Please see attachment on eliminated programs for details.				
OARM / EPM / Geographic Program: South Florida				
\$79 K; 0.0 FTE	(\$79)	0.0	\$0	0.0
This program has been eliminated. Please see attachment on eliminated programs for details.

OLEM / OIL / Oil Spill: Prevention, Preparedness and Response \$2,503 K; 83.1 FTE This decision reduces the program by \$317K and 20.8 FTE. The program is to focus on core activities and high priority items.	(\$317)	(3.2)	\$0	(17.6)
OLEM / E-MAN / RCRA: Waste Management \$2,621 K; 7.9 FTE This decision reduces the program by \$2,621K in nonpay. The program is to finalize system and regulatory development and support FTE using carryover funds and funds collected through user fees.	(\$2,621)	0.0	\$0	0.0
OLEM / SF / Homeland Security: Preparedness, Response, and Recovery \$22,933 K; 64.9 FTE This program change decreases \$16,443K in non-pay resources and 14.1 FTE. FTEs are reduced from Preparedness, Response, and Pre-deployments.	(\$15,443)	(4.5)	(\$1,000)	(9.6)
OLEM / SF / Homeland Security: Protection of EPA Personnel and Infrastructure \$1,086 K; 0.0 FTE This program change decreases \$544K in non-pay resources. The program will need to focus on highest priority activities.	(\$544)	0.0	\$0	0.0

President's Budget: Base Budget Adjustments

NPM / Appropriation / Program Project (FY 2016 ENA Base Non-Pay \$K/FTE)	FY 2018 Adjustments			
	HQ		RT	
	\$K	FTE	\$K	FTE
OLEM / SF / Superfund: Emergency Response and Removal \$143,869 K; 243.7 FTE	\$0	(1.5)	(\$29,240)	(17.6)
This decision reduces the program by \$29,240K in nonpay and 19.1 FTE. This decreases federal funds for non-time critical removal actions and non-cleanup support contracts, returning responsibility for cleanups to states and local communities. The program also is encouraged to maintain its current level of On-Scene Coordinator FTEs and to increase Superfund special account utilization when appropriate and available.				
OLEM / SF / Superfund: EPA Emergency Preparedness \$1,625 K; 37.4 FTE	(\$534)	(0.5)	\$0	(1.2)
This decision reduces the program by \$534K in nonpay and 1.7 FTE. The funding level emphasizes efficiency efforts and reflects completion of initial response training program and the shift to webinar-based exercises.				
OLEM / SF / Superfund: Federal Facilities \$5,042 K; 103.2 FTE	(\$250)	(0.7)	(\$263)	(4.7)
This decision reduces the program by \$513K in nonpay and 5.4 FTE. The program should continue to focus on priority oversight at federal facility sites. The program also is encouraged to increase Superfund special account utilization when appropriate and available.				
OLEM / SF / Superfund: Remedial \$371,887 K; 868.8 FTE	(\$25,000)	(10.6)	(\$127,759)	(53.1)
This decision reduces the program by \$152,759K in nonpay and 63.7 FTE. The program is to continue to prioritize the use of existing settlement funds to clean up hazardous waste sites and look for ways to remove some of the barriers that have delayed the program's ability to return sites to the community. The program also is encouraged to increase direct charging FTE to Superfund special accounts, as appropriate.				
OLEM / Reimb / Base Realignment and Closure (BRAC) \$0 K; 9.0 FTE	\$0	0.0	\$0	(9.0)
This decision reflects the expiration of the current BRAC interagency agreement which occurred on September 30, 2016.				
ORD / S&T / Homeland Security: Preparedness, Response, and Recovery \$13,415 K; 49.8 FTE	(\$3,681)	(4.3)	\$0	0.0
This program change decreases \$3,681K in non-pay resources and 4.3 FTE. This reduces homeland security research efforts. Of the 4.3 FTE reduction, 3.0 FTE are reduced from the Decon and Consequence Management Program, 0.3 FTE are reduced from the Water Infrastructure Protection Research Program, and 1.0 FTE is reduced from the Threat and Consequence Assessment Program.				
ORD / S&T / Human Health Risk Assessment \$12,910 K; 165.4 FTE	(\$5,645)	(104.8)	\$0	0.0
This program change decreases \$5,645K in non-pay resources and 104.8 FTE. This change reflects the elimination of the IRIS program and the re-focusing on core statutory obligations.

This reflects all WIFIA FTE and resources being consolidated into the WIFIA program project.</p>	\$18,200	12.0	\$0	0.0

Eliminated Programs

The following program projects below have been fully eliminated for all offices, to include all activities, RPIOS, and appropriations, for FY 2018 President's Budget.

Alternative Dispute Resolution (\$742k; 6.7 FTE; EPM & SF)

Funding and FTE for this lower priority activity are eliminated.

Beach / Fish Programs (\$1,404k; 3.8 FTE; EPM)

Resources and FTE supporting the Beaches protection grants as well as the efforts related to risks associated with consumption of locally caught fish are eliminated. Program is to identify potential statutory obligations that must be fulfilled by the EPA and provide implications for inaction, and/or under what alternative programs they will be fulfilled.

Categorical Grant: Beaches Protection (\$9,549k; 0.0 FTE; STAG)

Funding for this mature program is eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Categorical Grant: Lead (\$14,049k; 0.0 FTE; STAG)

Funding for this mature program is eliminated, returning the responsibility for funding to state and local entities. Program is to identify statutory obligations that must be fulfilled by the EPA and provide information on how and under what alternative program they will be fulfilled.

Categorical Grant: Multipurpose Grants (\$21,000k; 0.0 FTE; STAG)

Funding for this one-time grant program is eliminated.

Categorical Grant: Nonpoint Source (Sec. 319) (\$164,915k; 0.0 FTE; STAG)

This grant program is eliminated as part of the effort to limit federal investment in duplicative activities. The agency should continue to coordinate with the USDA on targeting funding where appropriate to address non-point sources.

Categorical Grant: Pollution Prevention (\$4,765k; 0.0 FTE; STAG)

This grant program is eliminated as part of the effort to limit or eliminate federal investment in activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Categorical Grant: Radon (\$8,051k; 0.0 FTE; STAG)

Funding for this mature program is eliminated, returning the responsibility for funding local environmental programs to state and local entities.

Categorical Grant: Underground Storage Tanks (\$1,498k; 0.0 FTE; STAG)

Funding for this mature program is eliminated, returning the responsibility for funding local environmental programs to state and local entities.

Climate Protection Program (\$69,698k; 224.1 FTE; EPM, S&T)

This program is eliminated to focus agency resources on its core statutory requirements. The Climate Partnership voluntary programs contained in the program project are eliminated. Within this, the 14 voluntary partnership programs are also eliminated as part of the effort to better target and prioritize activities related to core environmental statutory requirements. These voluntary partnership programs are as follows: Energy Star, Green Power Partnership (GPP), Combined Heat & Power Partnership (CHPP), Natural Gas STAR, AgSTAR, Landfill Methane Outreach Program (LMOP), Coalbed Methane Outreach Program (CMOP), Voluntary Aluminum Industrial Partnership (VAIP), SF6 Reduction Partnership for Electric Power Systems (EPS), Responsible Appliance Disposal Program (RAD), GreenChill Partnership, State and Local Climate Energy Program, Center for Corporate Climate Leadership, and SmartWay.

Endocrine Disruptors (\$5,938k; 8.9 FTE; EPM)

As part of the overall effort to limit federal spending on lower priority programs or on duplicative functions that can be absorbed into other programs, funding for this mature program is eliminated. The principal goals for the program have been accomplished; for the remainder, program is to identify critical work and provide information on implications for inaction, and/or how and under what program it will be accomplished.

Environmental Education (\$7,154k; 11.1 FTE; EPM)

This mature program is eliminated as part of the effort to limit federal investment in activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Environmental Justice (\$1,954k; 40.3 FTE; EPM, SF)

This program is eliminated as part of the effort to limit federal investment in activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Geographic Program: Chesapeake Bay (\$66,743k; 39.9 FTE; EPM)

Funding and FTE for the geographic program is eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Geographic Program: Gulf of Mexico (\$2,798k; 14.3 FTE; EPM)

Funding and FTE for the geographic program are eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities. Program is to identify statutory obligations that must be fulfilled by the EPA and provide implication for inaction, and/or information on how and under what alternative program they will be fulfilled.

Geographic Program: Lake Champlain (\$4,399k; 0.0 FTE; EPM)

Funding for the geographic program is eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Geographic Program: Long Island Sound (\$3,940k; 0.0 FTE; EPM)

Funding for the geographic program is eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Geographic Program: Other (\$6,723k; 4.9 FTE; EPM)

Funding and FTE for the geographic program are eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Geographic Program: Puget Sound (\$27,181k; 6.0 FTE; EPM)

Funding and FTE for the geographic program are eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Geographic Program: San Francisco Bay (\$4,474k; 1.9 FTE; EPM)

Funding and FTE for the geographic program are eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Geographic Program: South Florida (\$1,554k; 1.4 FTE)

Funding and FTE for the geographic program are eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Great Lakes Restoration (\$289,227k; 71.7 FTE; EPM)

Funding and FTE for the geographic program is eliminated, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Homeland Security: Critical Infrastructure Protection (\$7,698k; 23.1 FTE; EPM, S&T)

As part of the overall effort to limit federal spending on lower priority programs or on duplicative functions that can be absorbed into other programs, funding for this program is eliminated. The elimination of funding and FTE within this program specifically reflects a reduction in the Water Sector Risk Reduction, Water Security Initiative, and Water Alliance for Threat Reduction programs.

Indoor Air: Radon Program (\$1,513k; 10.6 FTE; EPM, S&T)

Funding and FTE for this mature program are eliminated, returning the responsibility for funding local environmental programs to state and local entities. Program is to identify potential statutory obligations that must be fulfilled by the EPA and provide implication for inaction, and/or information on how and under what alternative program they will be fulfilled.

Infrastructure Assistance: Alaska Native Villages (\$20,000k; 0.0 FTE; STAG)

Funding is eliminated for this targeted infrastructure program, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Infrastructure Assistance: Mexico Border (\$10,000k; 0.0 FTE; STAG)

Funding is eliminated for this targeted infrastructure program, returning the responsibility for funding local environmental efforts and programs to state and local entities.

Integrated Environmental Strategies (\$2,115k; 55.8 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

LUST Prevention (\$25,369k; 0.0 FTE; LUST)

Funding and FTE for this mature program is eliminated, returning the responsibility for funding local environmental programs to state and local entities. Program is to identify statutory obligations that must be fulfilled by the EPA and provide information on implication for inaction, and/or under what alternative program they will be fulfilled.

Marine Pollution (\$4,246k; 37.4 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in activities that go beyond the EPA's core statutory requirements and are duplicative and can be absorbed into other programs (at EPA or other agencies) to focus agency resources on its highest national priorities. Program is to identify potential statutory obligations that must be fulfilled by the EPA and provide information on implication for inaction, and/or how and under what alternative program they will be fulfilled.

National Estuary Program / Coastal Waterways (\$20,495k; 43.6 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities. Program is to determine approach related to role as chair of Gulf Hypoxia Taskforce.

Pollution Prevention Program (\$3,997k; 58.1 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Radiation: Protection (\$3,321k; 59.1 FTE; EPM, S&T, SF, WR)

This program is eliminated as part of the effort to limit federal investment in lower priority activities including those that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities. Program is to identify statutory obligations that must be fulfilled by the EPA and provide information on implication for inaction, and/or how and under what alternative program they will be fulfilled.

RCRA: Waste Minimization & Recycling (\$1,888k; 51.0 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Reduce Risks from Indoor Air (\$7,671k; 40.7 FTE; EPM, S&T)

This program is eliminated as part of the effort to limit federal investment in lower priority activities including those that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities. Program is to identify statutory obligations that must be fulfilled by the EPA and provide information on implication for inaction, and/or how and under what alternative program they will be fulfilled.

Regional Science and Technology (\$1,164k; 2.0 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities including those that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Science Policy and Biotechnology (\$467k; 5.4 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities, including duplicative functions that can be absorbed into other programs, to focus agency resources on its highest national priorities.

Small Minority Business Assistance (\$372k; 8.9 FTE; EPM)

This program and the Small Business Ombudsmen Program are to be combined to leverage common goals and mission.

Stratospheric Ozone: Multilateral Fund (\$8,928k; 0.0 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Targeted Airshed Grants (\$20,000k; 0.0 FTE; STAG)

This program is eliminated as part of the effort to limit federal investment in lower priority activities including those that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities.

Toxic Substances: Lead Risk Reduction Program (\$2,259k; 72.8 FTE; EPM)

Funding and FTE for this mature program is eliminated, returning the responsibility for funding to state and local entities. Program is to identify statutory obligations that must be fulfilled by the EPA and provide information on implication for inaction, and/or how and under what alternative program they will be fulfilled.

Trade and Governance (\$2,930k; 18.0 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in lower priority activities that go beyond the EPA's core statutory requirements and to focus agency resources on its highest national priorities. Elimination includes the Commission for Environmental Cooperation resources.

US Mexico Border (\$895k; 14.7 FTE; EPM)

This program is eliminated as part of the effort to limit federal investment in activities that go beyond the EPA's core statutory requirements, to return the responsibility to state and local entities, and to focus agency resources on its highest national priorities.

Water Quality Research and Support Grants (\$26,178k; 4.0 FTE; EPM, S&T)

This Congressionally added grant program is eliminated.

Eliminated Sub-Programs

For the following program projects below, only the activities listed are being eliminated from the program project. Other work within the program project will continue at the FY 2018 President's Budget funding levels.

Executive Management (\$1,795k; 12.0 FTE; EPM) – Office of Public Engagement

The Office of Public Engagement is eliminated as part of the effort to limit federal investment in activities that go beyond the EPA's core statutory requirements, including functions that are duplicative, to focus agency resources on its highest national priorities.

Research: Air Climate and Energy (\$10,570k; 0.0 FTE; S&T) – STAR Research

This grant program is eliminated as part of the effort to better target and prioritize activities in the Office of Research and Development to support decision-making related to core environmental statutory requirements.

Research: Chemical Safety and Sustainability (\$6,270k; 0.0 FTE; S&T) – STAR Research

This grant program is eliminated as part of the effort to better target and prioritize activities in the Office of Research and Development to support decision-making related to core environmental statutory requirements.

Research: Safe and Sustainable Water Resources (\$5,098k; 0.0 FTE; S&T) – STAR Research

This grant program is eliminated as part of the effort to better target and prioritize activities in the Office of Research and Development to support decision-making related to core environmental statutory requirements.

Research: Sustainable and Healthy Communities (\$13,587k; 0.0 FTE; S&T) – STAR Research

This grant program is eliminated as part of the effort to better target and prioritize activities in the Office of Research and Development to support decision-making related to core environmental statutory requirements.

Research: Air Climate and Energy (\$19,405k; 47.3 FTE; S&T) - Global Change Research

The EPA's climate change research conducted in coordination with the US Global Change Research program is eliminated as part of the effort to better target and prioritize activities in the Office of Research and Development to support decision-making related to core environmental statutory requirements.

Surface Water Protection (\$3,075k; 8.0 FTE; EPM) - WaterSense

This grant program is eliminated as part of the effort to better target and prioritize activities to support decision-making related to core environmental statutory requirements.

FY 2018 President's Budget Policy Guidance

Government-wide Policy

OMB included reference to many government-wide policies in the FY 2018 Passback. Please ensure that they are included in your budget submissions and factored into decision-making as appropriate. Several of the below items require discussions with OMB as dates, some of which have already passed, and requirements may be difficult to meet based upon revised funding levels and approaches.

Agency-wide Policy Direction

Reorganization:

OMB suggested several reorganizations to support changes in FTE levels proposed in the Passback. Of those, the agency did agree to the consolidation of the Federal Facilities Enforcement Office being merged with the Office of Site Remediation Enforcement. However, decisions on other reorganizations will be part of a larger discussion on reshaping the work and workforce in the agency.

Workforce:

The budget includes significant reductions in FTE. The hiring freeze will remain in place while the agency develops a comprehensive workforce reshaping plan. The agency will chart a workforce path that seeks to align capacity with Administration priorities, takes advantage of opportunities for more efficient practices and organizational structures, minimizes separation costs, and enables adjustment to final appropriation levels without major disruptions to the agency's work. Further guidance from OMB and OPM is expected to guide development for workforce reshaping plans.

Physical Footprint:

OARM and OCFO will work with impacted program and regional offices as work proceeds on the strategic review with OMB and GSA to analyze the needs of the agency regarding its physical footprint, including that of office, warehouse, and laboratory space. The agency is seeking opportunities to further reduce our facility footprint and/or implement planned and pending moves/consolidation in an expedited and most cost effective manner.

Infrastructure Initiative:

The National Economic Council (NEC) and OMB will reach out to EPA in the coming weeks/months to discuss next steps on the initiative to rebuild and modernize America's infrastructure.

Multi- NPM Policy Direction

Endocrine Disruptor Screening Program:

OCFO will schedule a meeting with OMB (that includes representatives of OCSPP, ORD, OW, and OA) no later than June 15, 2017 to discuss how EPA will integrate endocrine disruptor screening into its existing programs for risk assessment and risk regulation.

Facilities Infrastructure and Operations (OARM, ORD):

The laboratory consolidations in Corvallis, OR and Lakewood, CO are expected to be completed in 2018, as well as substantial progress on the laboratory consolidation in Athens, GA. OMB has requested an update on these three consolidation projects, including the amount of FY 2017 funds that have been spent on these projects, as well as the FY 2018 funds necessary for completion.

Funding levels incorporate rent cost avoidance from several regional and headquarters offices (Potomac Yards North, Region 1, Region 5, and Region 9), the decommissioning of part of the Las Vegas laboratory, and the release of the headquarters warehouse in Washington D.C. It further assumes rent cost avoidance from the ongoing Region 2 office consolidation project that is expected to be completed in FY 2017. If funds need to be reallocated between EPM and S&T accounts, OARM may propose an alternative breakdown.

ORD and OARM are to provide updated information regarding an alternative to extending the lease at the University of Nevada, Las Vegas. Please provide initial estimates of cost, viability, and any potential mission-related impacts associated with the best options for such a move. OMB requested this information, and any other update related to the current Las Vegas lease, to be submitted by March 31, 2017. OARM and ORD should work together to prepare the requested information as we negotiate with OMB for a new date.

OCFO and OARM will work together on additional impacts of the OMB guidance on activities in FY 2018.

U.S. - Mexico Border (OEM, ORCR, OAR, OW):

OMB requests a crosscutting summary of EPA spending, both intramural and extramural, on activities on the Border region in FY 2017 by October 15th.

Buy and Manage like a Business (OARM, OEI):

To the maximum extent practicable, as reflected in the FAR, especially for the acquisition of common goods and services, OMB has directed agencies to use existing contract solutions. For those solutions that have been identified as "Best in Class" (BIC) solutions, the agency shall review existing targets, if established, and submit a plan by May 29, 2017 to aggressively increase spending through current and future BIC solutions to the maximum extent practicable, consistent with existing policies. In cases where transition to BIC solution(s) is not practicable, or OARM does not plan to significantly increase use of the solution(s), OMB directs the plan should include an analysis of the existing agency solution(s) and demonstrate that the current solution(s) is more efficient and effective than the BIC solution.

OEI is to submit a plan to OMB to consolidate information technology infrastructure in the areas of wireless devices/services, hardware, software, and network services as well as to utilize approved solutions as soon as practical. The due date is April 24, 2017.

NPM Specific Policy Direction

OAR

Climate Protection Program:

OAR, working with OGC, should begin developing legislative options and associated groundwork for transferring ownership and implementation of Energy Star to a non-governmental entity. OAR also should explore similar transfer opportunities for the remaining partnership programs. OAR should work with OCFO and OGC to identify any legislative language needed to transfer voluntary programs.

Federal Vehicle and Fuels Standards and Certification:

OAR must work with OCFO and OGC to update the fee rule for the full Motor Vehicle Engine Compliance, to recover the full costs of the program, in time for implementation in FY 2018.

OARM

Acquisition Management:

In FY 2018, Federal agencies are encouraged to aggressively pursue strategic sourcing opportunities. OARM is to provide an options paper for achieving greater alignment of the regional offices' contracting function with agency- and government-wide procurement policies. OARM should work to establish a date these deliverables can be submitted.

Human Resources Management:

In anticipation of a need for a fully operational human resources program to perform workforce reshaping activities, OARM is not to reallocate funding or FTE from Human Resources Management that will impact that function.

OCSPP

Toxic Chemicals - Chemical Risk Review and Reduction:

OMB requested updated budget projections as TSCA reform implementation gets underway. OCSPP is to expedite the TSCA fee rule to generate the fee funding assumed in the FY 2018 President's Budget.

Pesticides seek to Program:

Sizeable unobligated balances in EPA's FIFRA fee accounts are to be used to offset FY 2018 funding levels. Additionally, any potential additional fee collections from the upcoming reauthorization of PRIA could help offset reductions to the program.

OECA

Enforcement Duplication:

OECA is to focus on eliminating potential duplication of enforcement actions carried out by states and prioritize federal inspections and enforcement activities. OECA is to shift focus to non-delegated programs and encourage states with delegated authorities to assume more active enforcement roles.

Civil Enforcement and Compliance Monitoring:

OECA is to evaluate ways to reduce federal enforcement inspections while keeping a consistent and effective enforcement program.

Superfund:

The Federal Facilities Enforcement Office is to be merged with the Office of Site Remediation Enforcement.

OEI

Implementing Cybersecurity: High Value Assets

OEI is to lead EPA's effort in protecting investments in information technology systems that support, host, or connect with agencies identified High Value Assets (HVAs), as outlined in M-17-09.

Implementing Cybersecurity: Agency Risk Assessment

OEI shall provide a cybersecurity risk management report to OMB. This report shall include the following: the mitigation and acceptance choices made by the Administrator including strategic, operational, and budget considerations, documentation of any accepted risk, and a description of the Agency's plan to implement the NIST Cybersecurity Framework. OMB will follow up with further guidance and a specific date in the coming weeks.

Modernizing Legacy Information Technology:

By April 3, 2017, OEI must submit to OMB a modernization plan to retire or replace at least one high priority legacy IT system beginning in FY 2018 through the use of cloud or shared services. OEI is encouraged to focus their initial efforts on their identified high value assets. The total estimated project cost must fit within topline guidance levels and shall not assume an increase in out-year IT resources. The planned transition should not exceed two years, and shall not be a modernization that is already in progress as of January 31, 2017. The project must modernize a system(s) that is currently designated as "major" on the IT Dashboard, comply with relevant cyber security standards, demonstrate improvements in operational effectiveness, and incorporate sound estimates of annual cost avoidance.

OIG

Office of Inspector General:

The OIG may propose an alternative allocation between the OIG and Superfund accounts. Any such proposal should be submitted to OCFO by April 3, 2017.

ORD

Office of Research and Development:

ORD is to reconfigure and restructure its activities to support the Administration's priority of reducing burdens related to certain regulations as it relates to scientific research and development performed by ORD's workforce. ORD will begin the prioritization process of specific intramural research activities, such as those that are tied to environmental statutes. ORD should focus its resources on intramural activities that are either related to statutory requirements or that are related to basic research inquiries in the environmental and human health sciences.

Chemical Safety and Sustainability:

ORD should seek to realize efficiencies between the mission of this research program area and the chemical screening mandates under the Frank R. Lautenberg Chemical Safety for the 21st Century Act.

OLEM

Superfund:

OLEM is encouraged to focus on activities that bring human exposure and groundwater migration under control while scaling back assessment activities, grants to communities, and revisions to existing guidance documents.

e-Manifest:

OLEM is to utilize its unobligated balances to complete the first version of the e-Manifest system and begin operations.

Superfund: Emergency Response and Removal:

No FTE reductions are to be applied to the On Scene Coordinator FTE pool.

Superfund: Remedial:

Of the amount provided, \$150 million in appropriated funds should be allotted to the remedial action allowance. None of the funds made available are to be used to finalize or enforce the proposed CERCLA 108(b) rulemaking on the hardrock mining industry, as the rule is currently written.

OW

Clean Water Act Programs:

Within the Office of Water's Clean Water Act-related programs, priority is to be given to functions required by statute and mirrors the overall goal of decreased federal involvement in local programs. OW is to analyze future workload demands and capacity, including those required to implement changes to the Clean Water Rule (WOTUS), at FY 2018 funding levels.

Homeland Security:

Significant reductions were made to the Lab Response Network, and Preparedness Response and Pre-deployment activities, with more modest reductions across the remaining Homeland Security Activities.

Water Infrastructure Finance and Innovation Act (WIFIA):

The FY 2018 Presidents Budget allocated \$20 Million for the WIFIA program account, of which \$3 million provides for administrative expenses and \$17 million in credit subsidy. Additional administrative expenses are to be funded by fee collections.

**Office of the Administrator
FY 2018 Activities**

Instructions: For each program project in the below list, provide bullets for what work will be performed at the FY 2018 funding level and what activities will not be performed compared to current funding levels. For each major activity, provide a descriptive bullet of the activity. Please follow the format shown under the first program project for all program projects.

Consider the following:

1. *Statutory Requirements*
2. *Adjustments to priorities*
3. *Options for consolidations of functions if statutory requirements exist in eliminated programs*
4. *Known performance impacts*

EPM 43 Brownfields
