- We have numerous work streams up and running:
  - Plenary Meetings. Next one in Sante Fe, October 26th & 27th
  - Sectoral Work Streams (Ongoing Zoom Meetings);
  - Web-based repository for planning resources;
  - Assistance matching funding to measures;
  - Cross-cutting topics work on emissions quantification, benefits analysis; and achieving equitable outcomes.

## State Plans and Policies

Explore existing state plans and policies

The Conveners Network looked at the 48 states participating in the CPRG program and found that 29 have an existing state plan. We included plans that:

- Are statewide and include identified goals and policy measures to reduce GHG emissions across at least one sector.
- In most cases, the plan is an official position that the state has adopted through some combination of legislative or executive action.
