NACAA Coffee Break

Monday October 2nd, 2023

AirKnowledge offers air quality training resources for state, tribal and local air agencies (other audiences use these resources as well, such as the public, EPA staff, the international community, academia, industry).

The AirKnowledge resources relate to topics within the scope of 8 curricula:

<u>Air Pollution Basics</u>
Air Quality Modeling
Air Quality Planning
Air Toxics Rule Development and Implementation
Ambient Air Monitoring
Emissions Inventories
Permitting
Source Emissions Testing and Source Emissions Monitoring

Training Developed Over the Past 3 Years

- 15 new e-learning courses relating to topics in the following curricula:
  - Air Pollution Basics (BASC)
  - Air Quality Planning (PLAN)
  - Air Toxics Rule Development (TOXC)
  - Emissions Inventories (EMIS)
  - Permitting (PERM)
  - Ambient Air Monitoring (AMBM)

The overview course BASC198-SI: Air Quality Management Under the Clean Air Act is great for new staff!

- 43 new e-learning modules relating to topics in all of the curricula listed above.

- 2 updated courses for in-person instruction relating to topics in the source testing and source monitoring curriculum (SRCE).
